

About Micro-Needling

Skin Needling is an exciting new treatment which has been shown to:

- Smooth wrinkles and fill deep lines
- Improve skin texture
- Relax scars
- Improve depressed acne scarring
- Improve the appearance of stretch marks
- Fill old surgical scars
- Improve chicken pox scars

Micro-Needling offers similar results to laser, chemical peels and dermabrasion, but is much less invasive, which means a lower risk of complications and a quick recovery time. Improvement in the appearance of scars and lines can be achieved through a series of treatments, spaced 2-3 months apart.

How Does Micro-Needling Work?

Micro-Needling and facial Mesotherapy is most easily performed using a Skin Roller. The Skin Roller causes multiple tiny pin point puncture wounds to the dermis.

This dermal injury induces the release of growth factors that stimulate the production of new collagen and elastin. New collagen production is the object of **ALL** skin resurfacing and rejuvenation treatments.

Micro-Needling creates dermal damage without the removal of the healthy epidermis, which happens with other resurfacing techniques.

Because the epidermis is left intact, the healing period is rapid. The skin does not risk permanent structural damage, sun sensitivity, skin color loss or hyper-pigmentation.

- All Mesotherapy Compounds can be used in Micro-Needling
- All DermaHeal Compounds can be used in Micro-Needling

Advantages of Micro-Needling

- Minimal risks - Safe - No risk of burns -FDA Approved
- Cost Effective - Less than laser treatments
- Short healing period
- Can be repeated
- No permanent skin damage/No ablation of the epidermis
- No increase in sun sensitivity
- Performed under topical anaesthesia
- Thin or pre-lasered skin can be treated
- Enhanced penetration of applied products
- Body produces natural collagen for long-lasting results
- Skin is thickened, tightened and elasticity is restored
- Suitable for all skin types--even thin skin and previously lasered
- Pigmentation marks are lightened
- Fine lines and wrinkles are softened and a reduction in pore size
- No risk of discoloration to the skin
- All areas of the face, neck and body can be treated
- Can last 5-10 years--or with natural aging process
- Excellent treatment for upper lip lines, wrinkles, photodamage, scarring (acne /chicken pox), and stretch marks
- Fades and softens scars/stretchmarks
- Promotes hair growth
- Can be performed on all skin colors
